DETAILED X-NODE CRYPTO MINING Sheet

BGLD

Black gold is a DEBT box project supported by and linked to the physical production and sale of crude oil. The BGLD mining license supports oil industry projects within exploration, drilling and production. Ultimately as a license holder you're rewarded for the blockchain mining support with BGLD tokens.

NATG

Natural Gas is a DEBT box project supported by and linked to the physical production and sale of natural gas. The NATG mining license supports natural gas industry projects within exploration, drilling and production. Ultimately license holders are rewarded for their blockchain mining support with NATG tokens.

GROW

GROW is the fourth DEBT Box project to launch and is supported by high yielding agriculture and partners with operating farms. Ultimately as a license holder you're rewarded for the blockchain mining support with Grow tokens.

DLG

Digital linked Gold is a DEBT Box project supported by and linked to the physical production and sale of gold. The DLG mining license supports the Gold industry projects within exploration, drilling and production. Ultimately license holders are rewarded for their blockchain mining support with DLG tokens.

ALUM

Aluminium project combines the advanced technology of XPLR with the location and extraction of bauxite, the main mineral in aluminium. Capitalizing on this technology-driven approach to the exploration of bauxite, ALUM directly influences the lowering of expenses during the exploration process, resulting in the increase of commodity production. Ultimately license holders are rewarded for their blockchain mining support with ALUM token.

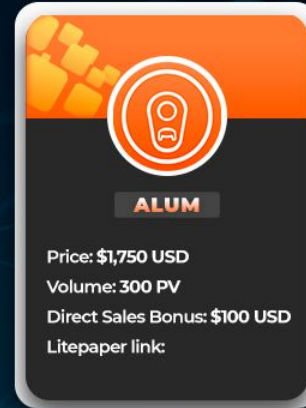

XPLR

XPLR is a project that provides technology and services to various commodity suppliers around the world. Using advanced proprietary remote sensing and satellite imagery technology this project offers the ability to create efficiencies in the processes of raw commodities. Ultimately license holders are rewarded for their blockchain mining support with XPLR token.

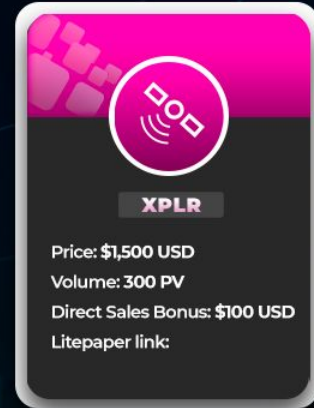

DLG

Price: \$1,500 USD
Volume: 250 PV
Direct Sales Bonus: \$100 USD

X-Node **POWERED BY DEBT**

Black gold is a DEBT box project supported by and linked to the physical production and sale of crude oil. The BGLD mining license supports oil industry projects within exploration, drilling and production. Ultimately as a license holder you're rewarded for the blockchain mining support with BGLD tokens.

BGLD

Natural Gas is a DEBT box project supported by and linked to the physical production and sale of natural gas. The NATG mining license supports natural gas industry projects within exploration, drilling and production. Ultimately license holders are rewarded for their blockchain mining support with NATG tokens.

NATG

GROW is the fourth DEBT Box project to launch and is supported by high yielding agriculture and partners with operating farms. Grow will contribute to the agriculture industry and will bring a unique revenue source back into the ecosystem. Ultimately as a license holder you're rewarded for the blockchain mining support with Grow tokens.

GROW

Digital linked Gold is a DEBT Box project supported by and linked to the physical production and sale of gold. The DLG mining license supports the Gold industry projects within exploration, drilling and production. Ultimately license holders are rewarded for their blockchain mining support with DLG tokens.

DLG

Aluminium project combines the advanced technology of XPLR with the location and extraction of bauxite, the main mineral in aluminium. Capitalizing on this technology-driven approach to the exploration of bauxite, ALUM directly influences the lowering of expenses during the exploration process, resulting in the increase of commodity production. Ultimately license holders are rewarded for their blockchain mining support with ALUM token.

ALUM

Explore is a project that provides technology and services to various commodity suppliers around the world. Using advanced proprietary remote sensing and satellite imagery technology this project offers suppliers of raw materials the ability to create efficiencies throughout the exploration, extraction, refining and or production processes of raw commodities. Capitalizing on a technology driven approach to the exploration industry XPLR will result in increased commodity production and ultimately license holders are rewarded for their blockchain mining support with XPLR token.
